Customized Clarinets – Repairs – Accessories - Advise

LP standard

All instruments described as “standard model” are checked by us, adjusted if necessary but kept otherwise as original as possible. If pads need to be replaced the same factory methods and materials are used to maintain the original factory sound and playing comfort

The standard factory instruments come with three different types of pads depending on the model:

- Fish skin pads (trouble free life expectancy 2 years)
- Leather (trouble free life expectancy 3 years)
- Gore-Tex (trouble free life expectancy 2 years)

The LP-Pro, LP Studio and LP-Soloist versions are equipped with material with higher durability and life expectancy, even under heavy professional use.

The following additional modifications are available on all instruments:

Resonance treatment

- LP metal socket for top to middle joint, for increased response and sonority and
- avoids a wobbling of the 2 joints
- Low E/F resonance mechanism for perfect pitch in the low register. The Low E resonance tone hole also enables you to play this note with the same evenness for which German clarinets are famous.
- L&P Ball-bearing systems offers stable connection on the long keys with pivot screws, for anyone travelling between areas with changing climates.
- Silent padding for anyone who wants a very quiet clarinet.

LP Warranty

We offer a free 8-day trial period (except return postage is chargeable)

All LP Pro, LP-Studio and LP-Soloist Version come with a 3-year warranty, which includes all intonation, and voicing needed to customize the instrument for your needs (except alterations which would require additional key work).

In addition we offer a 3-year warranty on all our repairs.
